

Universal- by Luke Spillane

Coming from Luke Spillane is the new album 'Universal' available at all the usual outlets on CD's, vinyl and streaming. To listen [click here](#)

The album is a selection of eclectic electronic based tracks made with love and upbeat drum beats and bass lines ☐

The tracks are all instrumentals and to start off with, the opening track is a fairly mid-tempo squeaky banger. At 2.58 seconds it could easily go on a bit longer!

The main track.. it is hard to say which track is the best but Luke says making the track 'Universal' was a standout moment.

'Yeah I just kept working on my sound, I've made lots of recordings over the years but I knew straight after making the track 'Universal' that I'd captured something I was sub-consciously striving for.'

The track 'Universal' is a strange sound and it's hard to put into a genre as it could span so many..

The tracks vary in tempo quite wildly. Going from the slow 75bpm 'Here on Earth' to the rapid 168bpm track 5 called 'On It'.

Luke wants to say how this music has healed alot of potential hurt in his life.

'I have struggled in my professional and personal life with mental health difficulties.'

Luke continues, 'I grew up in a very booming 90's and everything was fast bold and fun, some things change but I have lived a blessed life to witness all the styles and range of music that I have heard and I feel kind of like I have had this debt to pay and create something that captures my love of music and give something back to the scene. Music has always kept me strong and given me an anchor and direction so often that I would feel lost without it.'

If these tracks could inspire other people to get up and have a go that would complete Luke's dream.

'I hope my music inspires you'. Luke Spillane

Short Bio-

After years of experimenting with guitars, indie, dance and electro/techno music, Luke is now putting out some pure indie, a lot of which has a live feel and is mostly produced on the fly.

Luke is planning a UK tour and also has a new album called 'Universal', due out October 28th, 2022!

About Me

I make indie music. Have done for years now. I also sell merchandise such as CD's, clothes, USB Memory Sticks, and more!. [Click Here](#) for the press release
